***Note:** Regardless of the make and model of the vehicle, there are cases that compatible product number is different among the same model with the same year, because of the variation of the factory parts. Before installing this product, please compare the back of your steering wheel and the configuration of the boss kit, and see if they fit. Also, for the air bag indicator, some of the vehicles cannot be lighted off, or even if it could, it may light on later.

***Note:** Regardless of the make and model of the vehicle, there are cases that compatible product number is different among the same model with the same year, because of the variation of the factory parts. Before installing this product, please compare the back of your steering wheel and the configuration of the boss kit, and see if they fit. Also, for the air bag indicator, some of the vehicles cannot be lighted off, or even if it could, it may light on later.

[TOYOTA]

Regardless of the make and model of the vehicle, there are cases that compatible product number is different among the same model with the same year, because of the variation of the factory parts. Before installing this product, please compare the back of your steering wheel and the configuration of the boss kit, and see if they fit. Also, for the air bag indicator, some of the vehicles cannot be lighted off, or even if it could, it may light on later.

- We strongly recommend requesting the installation to professionals.

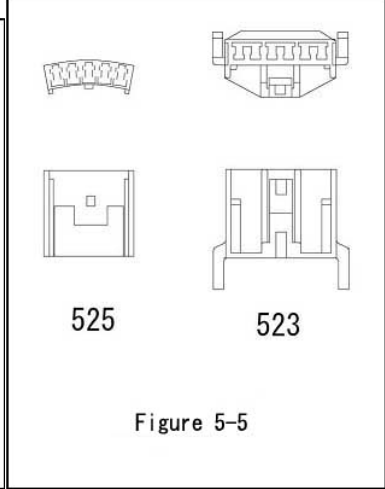

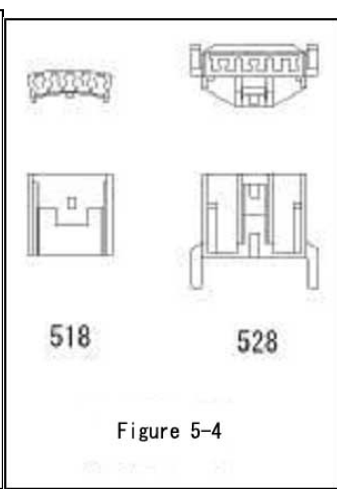

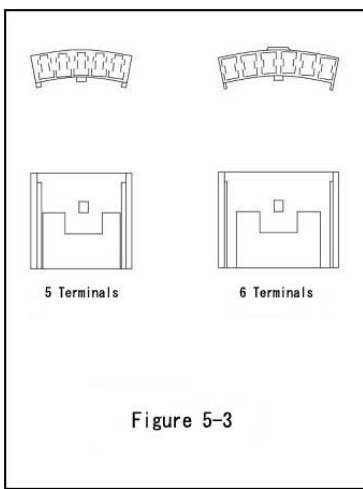

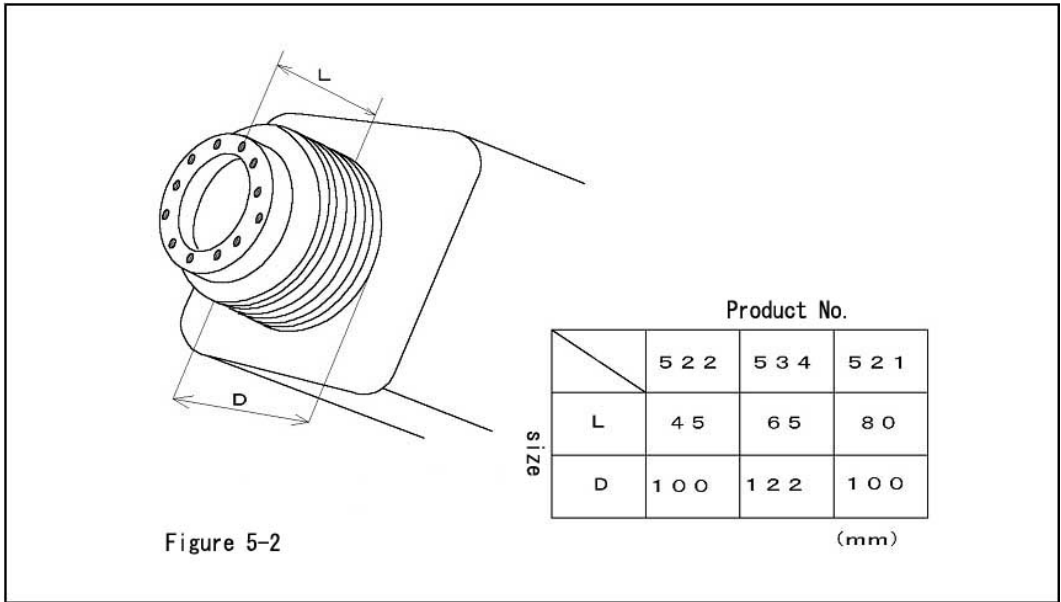

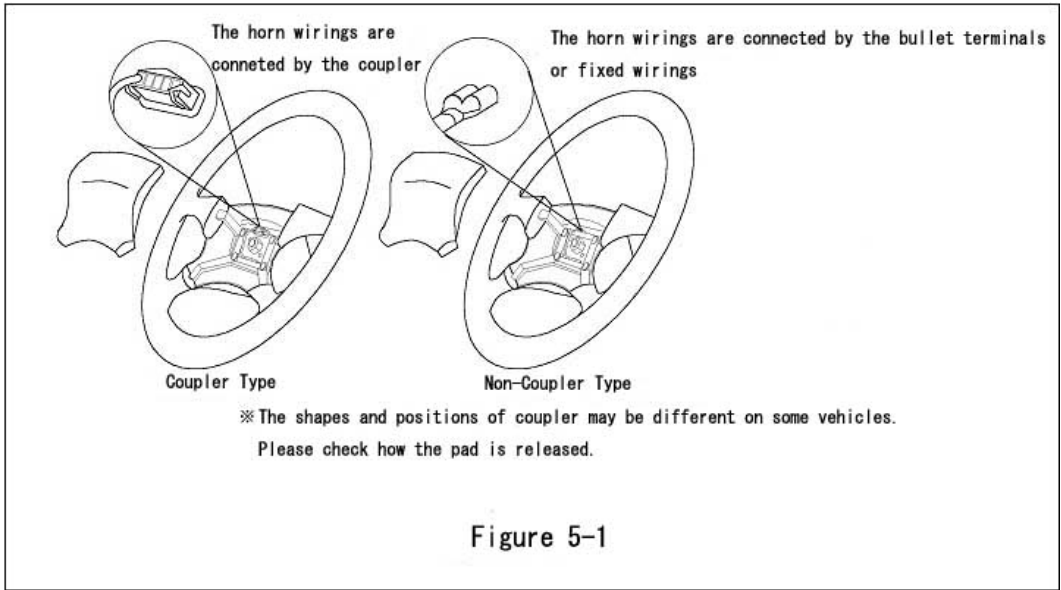

- Note* The compatibility is for the vehicle made before April 2009. Please inquiry us for vehicles made after April 2009.
- Note1 Requires an optional Boss Kit Spacer. (Please choose one from 10, 15, 20, 25 and 30mm)
- Note2 The vehicle that has the ACC main switch on the dashboard.
- Note3 The vehicle that has the ACC main switch on the steering wheel.
- Note4 6-terminal coupler may be used on some vehicles. Please inquire us for details then we will send you the sample coupler. (Figure5-3)
- Note5 The boss kit cannot be installed on MAJESTA 4WD.
- Note7 The functions on steering wheel except the horn cannot be used any more.
- Note8 The steermatic function will be disabled for steermatic-equipped vehicles.
- Note9 Boss Kit, #535 can be installed if the ACC function is unnecessary.
- Note10 Vehicle without SRS indicator in the meter is mechanical; And vehicle with SRS indicator is electrical.
- Note11 Please use boss kit, #528, if the horn coupler is rectangle with 6 terminals. (Figure5-4)
- Note12 The boss kit may be different depending on the configurations of the horn wirings. (Figure5-1)
- Note13 The configurations of installation sides for #521, #522 and #534 are identical. Please choose an appropriate one depending on the length and the diameter of the cover. (Figure5-2)
- Note14 Boss kit, #523 may be used for the vehicles without TRC. Please confirm the coupler configuration. (Figure5-5)
- Note15 If an optional SRS is installed, the configuration of the steering wheel back may be different. Recommends confirming the steering back carefully.
- Note16 The boss kit may not be installed on some vehicles depending on the difference of each vehicle. Please inquire us for details.
- Note17 The ACC function will be disabled on some cars. (Auto Cruise)
- Note18 Some compatible boss kits have been changed to #537. Please confirm the configuration of the factory steering winkle cancellation part. (Figure5-6)
- Note19 An additional U-Turn harness is required for dual stage airbag.
- Note20 The U-Turn harness may be necessary for the cars that have different airbag couplers.
- Note21 The optional Boss Spacer is necessary for telescopic system-equipped vehicle because the horn button interferes the center shaft.
- Note22 If the airbag indicator does not turn off or it relights after turning off with using the dummy harness, please stop the installation and contact us.
- Note23 Some boss kits have been changed to #539.

Equipment Explanation
